SUBJECT: *Di* ~~Empty Drums~~

RECEIVED

AUG 28 1980

DIV. OF HAZARDOUS MATERIAL
AND WASTE MANAGEMENT

Attached is the Ford Motor Company's request to dispose of 295 "empty drums" from the Valley of the Drums, at Smith's Landfill.

Please note the following:

1. The Division's decision regarding a non-hazardous, empty drum - see attached memorandum dated August 21, 1980.
2. I visually inspected all 295 drums. All residue from these drums were scraped so that the sides and bottom of each drum could be clearly seen.
3. Mr. Sam Horton (Ford Environmental Control Engineer) has verified that the residues from these drums have been identified by Ford personnel and contain no materials listed in the Federal Register (May 19, 1980) Section 261.33(e).
4. Chemical analyses on these materials have not shown the presence of Halogenated Hydrocarbons which would be characteristic of materials on the (e) list.

NOTE: The drum of anti-freeze will be recycled with the equipment used at Smith's Landfill.
